

Appendix II - revision

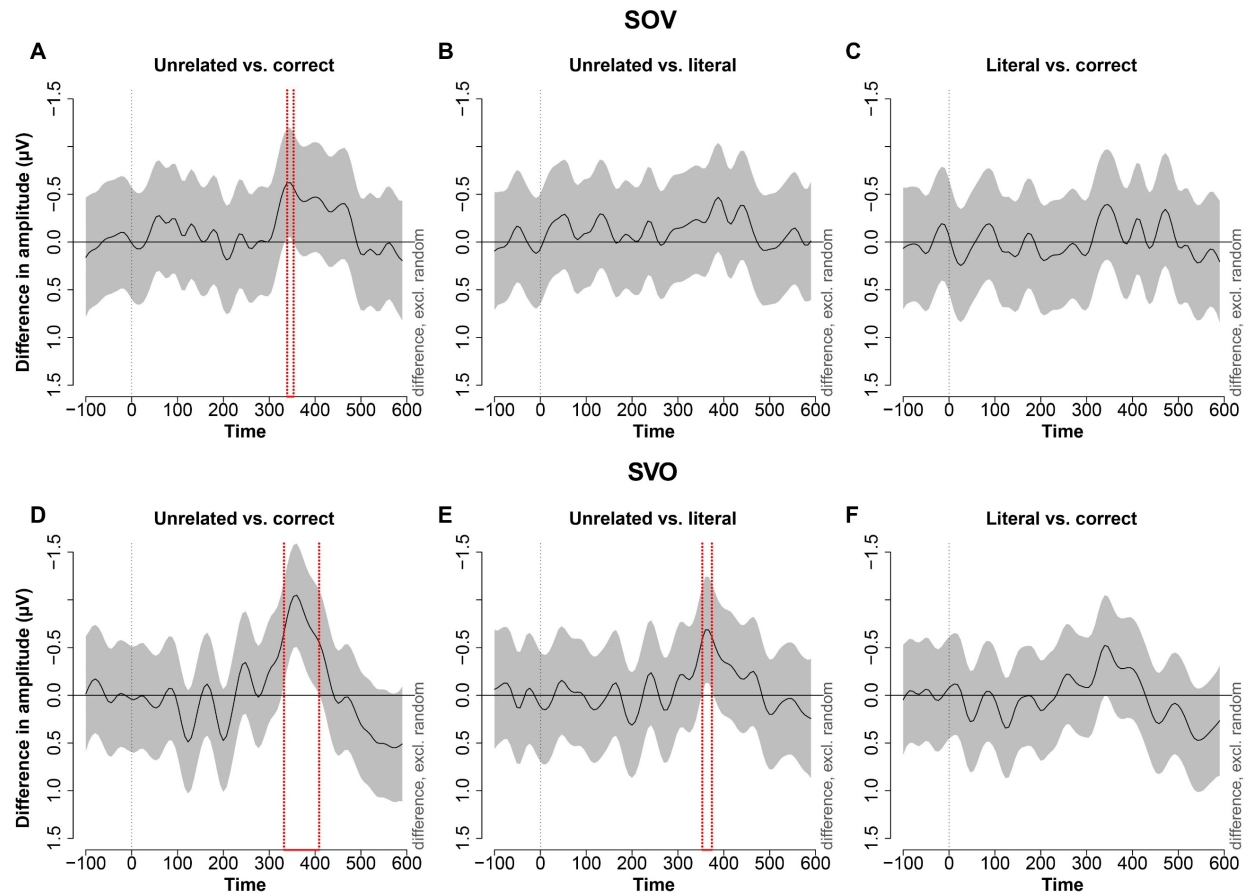

Figure A5. Difference in voltage change over time between the unrelated vs. correct condition, the unrelated vs. literal condition, and the literal versus the correct condition in SOV sentences (panel ABC) and SVO sentences (panel DEF). Red vertical lines indicate time windows in which the difference between conditions is significant.

Appendix II - revision

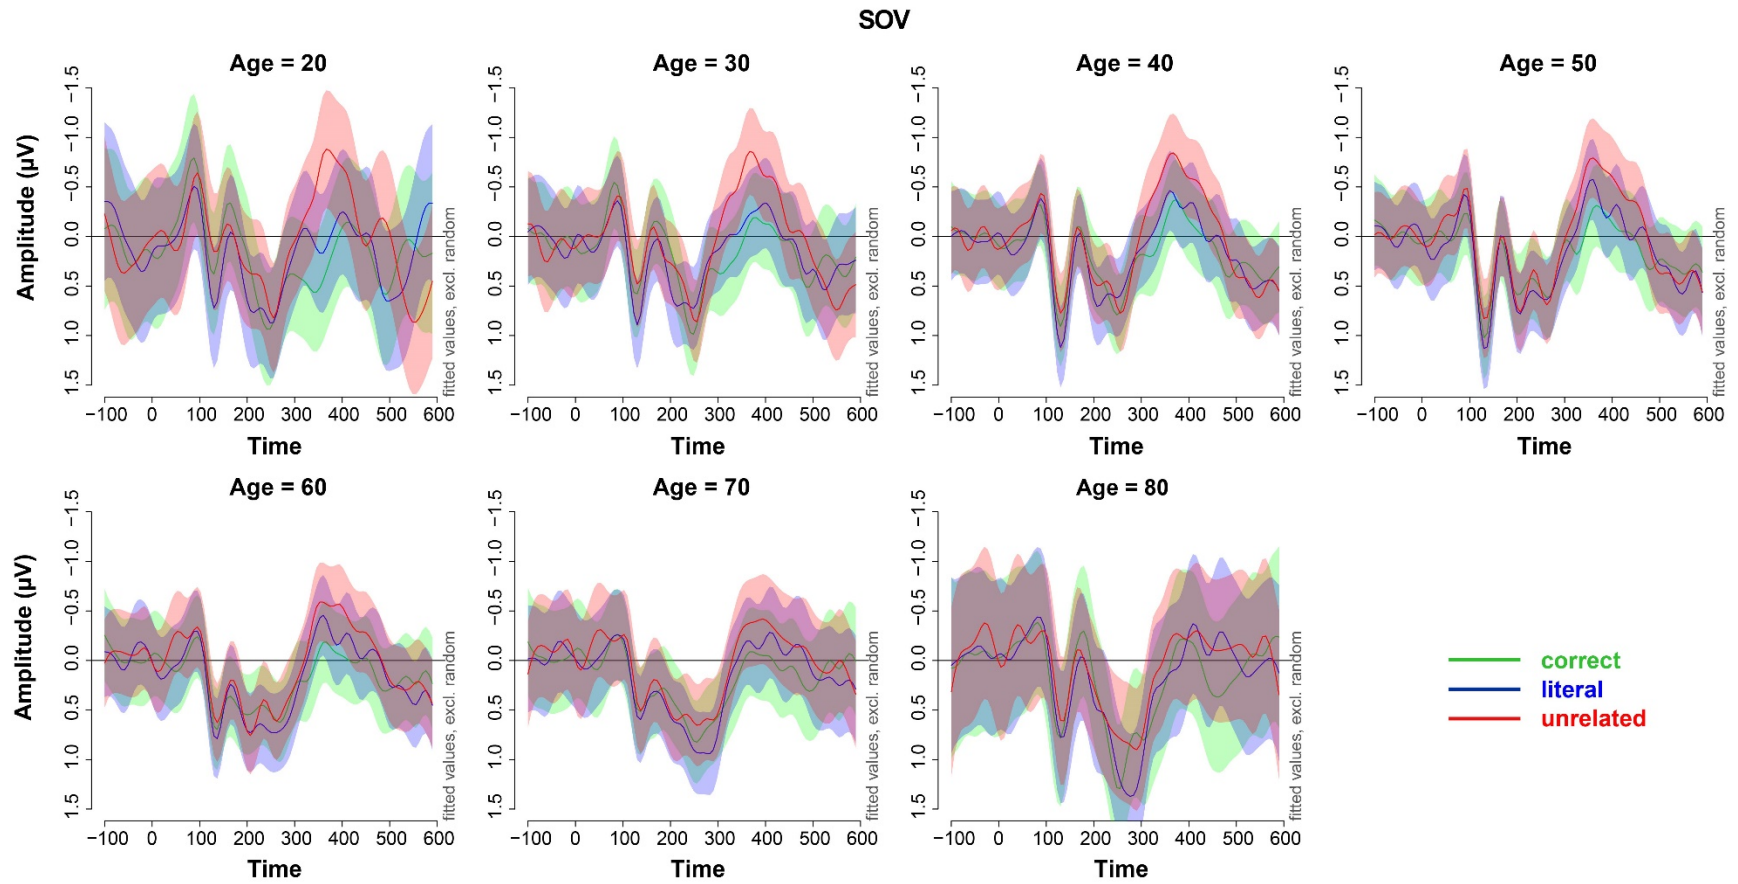

Figure A6. Summed effects for the voltage change over time in the correct (green), literal (blue), and unrelated (red) Target word condition in SOV sentences. Mean voltages are presented per age bin.

Appendix II - revision

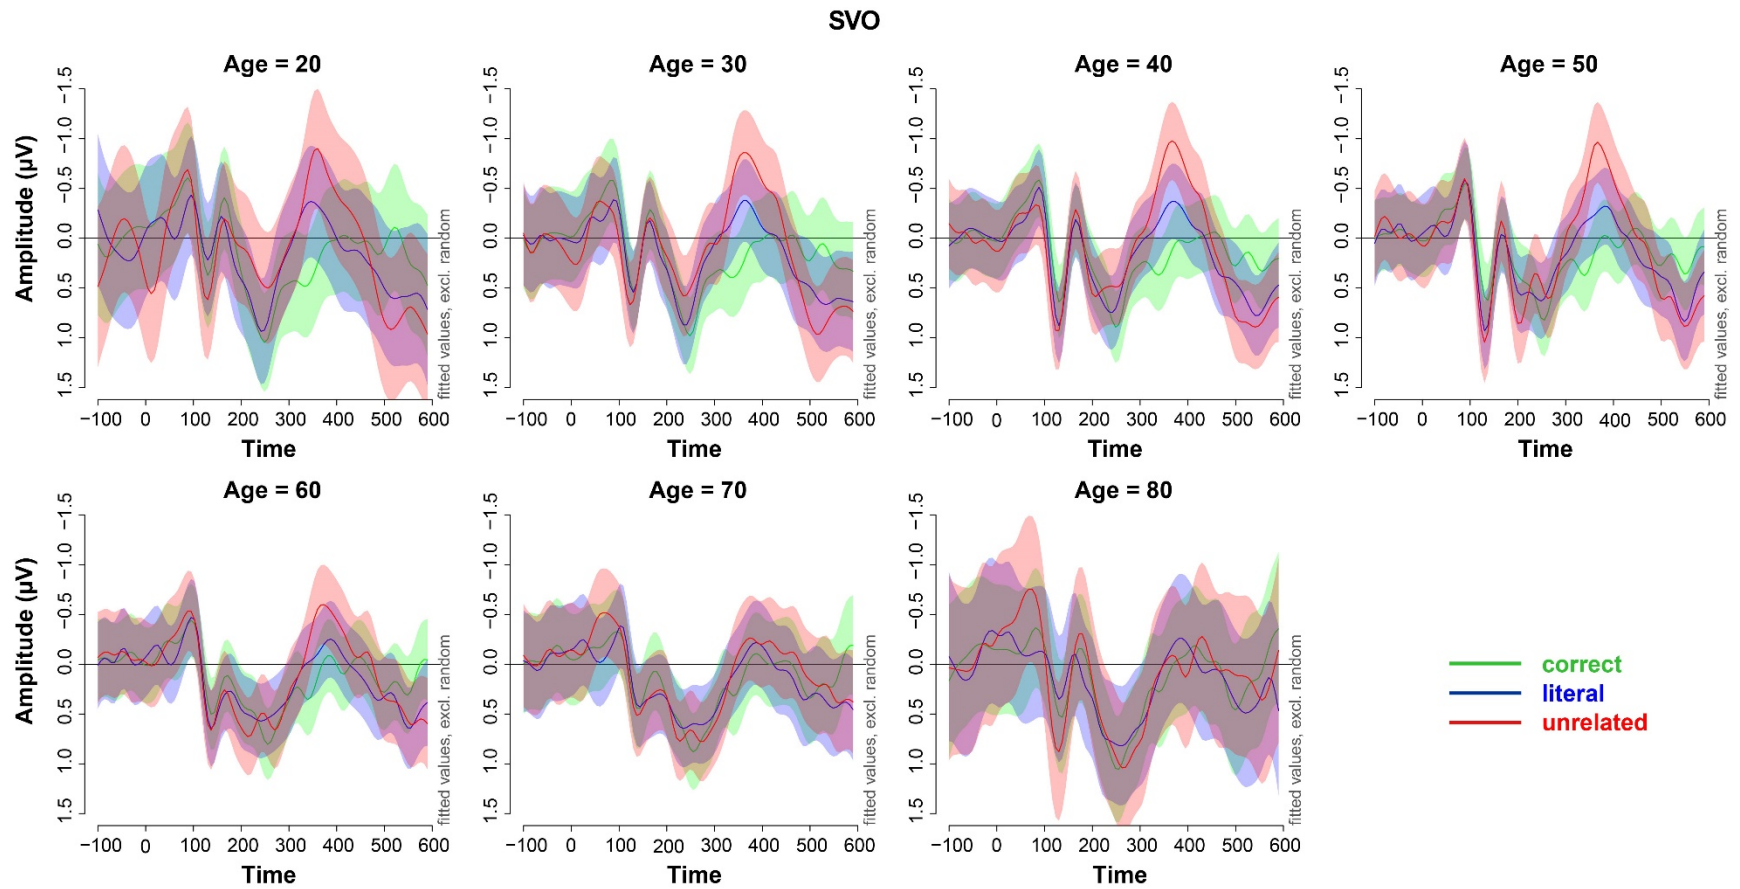

Figure A7. Summed effects for the voltage change over time in the correct (green), literal (blue), and unrelated (red) Target word condition in SVO sentences. Mean voltages are presented per age bin.
